

# DGT 5810-10

## DGT Call Taker Console with a touch screen

Efficient and comfortable call service

Easy-to-view display of serviced line status and performed operations

Easy and flexible configuration

Networking and parallel terminal operation

Integration with radio units (depending on the version)

DGT Call Taker Console with a touch screen increase the comfort of service and work. A large LCD panel, intuitive way of handling keys (touching the screen in a place related to the performed task) and flexible configuration make using the console easier and user friendly.

Depending on its version, the terminal may work in dispatch, dispatch-alarm-broadcast, conference or radio communication systems.

### Key features:

Call Taker Consoles with touch screens have a modular design which enables flexible deployment of elements for DGT systems and meeting the expectations of different clients.

The implemented high-quality LCD with excellent parameters, can be used in highly illuminated premises.

Dedicated software (depending on the version) supports large dispatch systems (up to 1000 keys), alarm and broadcast modes, up to 256 radio channels and 256 base stations. All software versions support system telephone set service with an advanced status display of incoming call queues and hot lines (in some versions up to 12 queues and up to 1000 lines).

It is possible to use a telephone directory as well as pre-defined sets of conference calls. The available options are defined by the system version and its hardware configuration.

#### • Computer

- processor Intel Celeron J1900,
- HDD 64GB mSATA,
- RAM 2 or 4 GB, max 8GB, DDR3 SODIMM,
- network 2 x GbE,
- 3 x USB,
- OS: Microsoft Windows 7/8/10

#### • Display

- 19" 1280 x1024 pixel LCD display with infrared touch screen interface

#### • Audio

- 6 independent speakers with volume control,
- gooseneck microphone,

- integrated handset with PTT button,
- integrated desktop microphone with 4 PTT buttons,
- wired headset interface, support for selected wireless Plantronics headsets

#### • Physical

- dimensions: 430 mm H x 110 mm D x 560 mm W,
- net weight: 11 kg,
- angle and height adjustment mechanism (~ 30 degrees / ~ 70mm)

#### • Power

- 12DC, AC adapter included
- Power over Ethernet (optional)
